one of the most important developments of the twentieth century has been the movement of humanity into space with machines and people the underpinnings of that movement why it took the shape it did which individuals and organizations were involved what factors drove a particular choice of scientific objectives and technologies to be used and the political economic managerial and international contexts in which the events of the space age unfolded are all important ingredients of this epoch transition from an earth bound to a spacefaring people the desire to understand the development of spaceflight in the united states sparked this documentary history series the extension of human activity into outer space has been accompanied by a high degree of self awareness of its historical significance few large scale activities have been as extensively chronicled so closely to the time they actually occurred many of those who were directly involved were quite conscious that they were making history and they kept full records of their activities because most of the activity in outer space was carried out under government sponsorship it was

accompanied by the documentary record required of public institutions and there has been a spate of official and privately written histories of most major aspects of space achievement to date when top leaders considered what course of action to pursue in space their deliberations and decisions often were carefully put on the record there is accordingly no lack of material for those who aspire to understand the origins and evolution of us space policies and programs this reality forms the rationale for this series precisely because there is so much historical material available on space matters the national aeronautics and space administration nasa decided in 1988 that it would be extremely useful to have a selective collection of many of the seminal documents related to the evolution of the u s civilian space program that was easily available to scholars and the interested public while recognizing that much of the space activity has taken place under the sponsorship of the department of defense and other national security organizations for the u s private sector and in other countries around the world nasa felt that there would be lasting value in a collection of documentary material primarily focused on the evolution of the u s government s civilian space program most of this activity has been carried out under the nasa s auspices since its creation in 1958 as a result the nasa history office contracted with the space policy institute of george washington university s elliott school of international affairs to prepare such a collection
